35 TO 150 AMP COMMERCIAL THERMAL CIRCUIT BREAKER

Introduction

The KLIXON® S series thermal breakers are designed to protect wiring and meet the harshest environmental requirements. The sealed circuit breakers are weatherproof for protection against moisture, dust, grease, fuel vapors and other harsh environments. The S series breakers are lightweight and designed to interrupt short circuits or overloads and combine trip-free protection with fast response time. Typical applications are protection of wire and cable of accessory circuits, equipment and battery protection on heavy trucks, buses, construction equipment, offroad vehicles, marine, recreational vehicles (RVs) and electric (hybrid) vehicles, and battery chargers.

The S series is available in both open and sealed body configurations with manual and automatic reset options.

Performance characteristics are based on room temperature (77°F, 25°C). Consult Derating curve for ambient temperatures significantly higher or lower than standard room temperature. Example: At 77°F (25°C) the device is calibrated to hold at 100% of rated current (1) and trip at 135% of rated current (2). At 140°F (60°C), the same device will hold at approximately 78% of rated current (3), and trip at approximately 115% of rated current (4).
